Final Year Project Computing Skills: Self-assessment update

Using the 0-5 scale, rate yourself for each of the computing-based and employability skills.

Computing and research skills	
Skill	**How confident do you feel with this skill? Rate 0-5 (never encountered to mastery).**
Researching information	4
Reading and understanding scientific papers	3
Referencing and citing sources accurately	4
Presenting data in figures	3
Analysing and interpreting data	4
Scientific communication (written and oral presentations)	3
Programming in a high-level language (e.g. Java, Python, JS, C/C++, Rust, etc.)	4
Software design (how to choose design pattern to implement functionalities of a software tool)	4
Testing and Evaluation (how to test a software tool and choose appropriate metrics for its evaluation)	3
Algorithms (how to design/choose appropriate algorithms and data structures to efficiently solve a computing problem)	3
Career readiness (you have the fundamental technical knowledge (coding skills, managing data, design, etc.) and soft skills (communication, problem solving and resilience, etc.) to	3

apply for jobs, successfully land roles, and perform effectively in industry)	
Problem solving (overcoming an unexpected challenge or issue)	4
